Fluid Phase Equilibria, 63 (1991) 359–360
Elsevier Science Publishers B.V., Amsterdam

Contents Volume 63 (1991)

Volume 63, Nos. 1–2

Equations of state from generalized perturbation theory. Part 1. The hard-core Lennard-Jones fluid
G.M. Sowers and S.I. Sandler (Newark, DE, U.S.A.) 1–25
Vapor–liquid equilibrium of water–trioxane–formaldehyde mixture
S. Brandani, V. Brandani and G. Di Giacomo (L'Aquila, Italy) 27–41
A PY-type pseudocubic perturbed hard-sphere equation of state
M. Kato, M. Yamaguchi, K. Aizawa and K. Sano (Fukushima, Japan) 43–48
Description of vapor–liquid equilibrium of the HCl/H_2O system using an activity-coefficient model
Y. Liu and U. Grén (Gothenburg, Sweden) 49–63
A method for the simultaneous phase equilibria and stability calculations for multiphase reacting and non-reacting systems
A.K. Gupta, P. Raj Bishnoi and N. Kalogerakis (Calgary, Alb., Canada) 65–89
Analysis of gas solubilities in alkanes using a hard sphere equation of state
R.J. Sadus (Hawthorn, Vic., Australia) and C.L. Young (Parkville, Vic., Australia) 91–99
Solute–solvent interactions: dissolution of sparingly soluble silver salts in aqueous–organic solvent systems
U.N. Dash, E. Pattanaik and R. Sahu (Bhubaneswar, India) 101–110
Low–temperature high-pressure crystallization and fluid-phase equilibria of the binary systems nitrogen + trifluoromethane and argon + trifluoromethane between 110 and 230 K and at pressures up to 200 MPa
J. Kulka and G.M. Schneider (Bochum, Germany) 111–128
Vapour–liquid equilibrium in ternary system *N,N*-dimethyl-formamide + water + ethanol at 313.15 K
J. Zielkiewicz and A. Konitz (Gdańsk, Poland) 129–139
Measurement of limiting activity coefficients for aqueous systems by differential ebulliometry
D.L. Bergmann (Urbana, IL, U.S.A.) and C.A. Eckert (Atlanta, GA, U.S.A.) . 141–150
Vapour–liquid equilibrium of the non-azeotropic refrigerant mixture formed by chlorofluoromethane and 1,1,1,2-tetrafluoroethane
K. Arita, T. Tomizawa, Y. Nagakawa and Y. Yoshida (Osaka, Japan) 151–156
Thermodynamics of ammonium sulfate–polyethylene glycol aqueous two-phase systems. Part 1. Experiment and correlation using extended UNIQUAC equation
Y.-L. Gao, Q.-H. Peng, Z.-C. Li and Y.-G. Li (Beijing, China) 157–171
Thermodynamics of ammonium sulfate–polyethylene glycol aqueous two-phase systems. Part 2. Correlation and prediction using extended UNIFAC equation
Y.-L. Gao, Q.-H. Peng, Z.-C. Li and Y.-G. Li (Beijing, China) 173–182
Properties of polar gases and their association in the liquid phase
K. Moorthi and I. Nagata (Kodatsuno, Japan) 183–210
Isothermal vapour–liquid equilibria of tetralin and 1-methylnaphthalene with triethylene glycol and *N*-methylpyrrolidone at 160 °C
S.K. Gupta and B.S. Rawat (Dehradun, India) 211–217

Vapour–liquid equilibria for the system butane/ethanol at 25.3, 50.6 and 72.5 °C
T. Holderbaum, A. Utzig and J. Gmehling (Oldenburg, Germany) 219–226

Erratum 227

Corrigendum 229

Volume 63, No. 3

Thermodynamics of binary mixtures containing linear or cyclic alkanones + *n*-alkanes or + cycloalkanes
H.V. Kehiaian and S. Porcedda (Paris, France), B. Marongiu (Cagliari, Italy) and L. Lepori and E. Matteoli (Pisa, Italy) 231–257

Comparative study of cubic equations of state for predicting phase behaviour and volumetric properties of injection gas-reservoir oil systems
A. Danesh, D.-H. Xu and A.C. Todd (Edinburgh, U.K.) 259–278

A study of the Buckingham exponential-six fluid mixtures
L.R. Dodd and S.I. Sandler (Newark, DE, U.S.A.) 279–315

Triple point corresponding states in long-chain *n*-alkanes
D.L. Morgan and R. Kobayashi (Houston, TX, U.S.A.) 317–327

Simple and predictive approach for calculating the high pressure and temperature vapour–liquid equilibria of binary mixtures by applying a UNIFAC equation of state method
E. Santacesaria, R. Tesser and M. Di Serio (Napoli, Italy) 329–340

On the isobaric vapour–liquid equilibrium of the cyclohexanol–phenylmethanol binary at 101.325 ± 0.067 kPa
A. Alp Sayar (Istanbul, Turkey) 341–354

Corrigendum 355–356
